

FAQIHUDDIN SYAKIR NIAM

Software Engineer | Backend Developer | Web Application Specialist
South Tangerang, Indonesia | 085161369612 | faqih.syakir11@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in developing and maintaining scalable web applications using Laravel, JavaScript (React/Vue), TypeScript and MySQL. Proven ability to build end-to-end systems including registration platforms, logistics management systems, and school information systems. Experienced in handling full development lifecycle, from system design, database optimization, API integration, to deployment and maintenance. Successfully improved system performance, reduced query load, and ensured application stability for daily operational use. Strong in backend development, REST API integration, and database design, currently expanding expertise in Golang for backend development and exploring AI-powered solutions to enhance automation and business efficiency. with the ability to work in fast-paced environments and continuously adapt to new technologies.

EDUCATION

Pamulang University

2013 – 2019

Bachelor of Computer Science

CORE COMPETENCIES

- **Backend Development (Laravel, PHP):** Designing and developing scalable backend systems, implementing business logic, and ensuring efficient application performance
- **Frontend Integration (React JS, Vue JS):** Integrating backend services with modern frontend frameworks to deliver responsive and user-friendly web interfaces
- **REST API Development & Integration:**
Building and integrating RESTful APIs to enable seamless communication between systems and third-party services
- **Database Design & Optimization (MySQL):** Designing relational databases, writing optimized queries, and improving database performance for high-efficiency data processing
- **System Performance Optimization:** Analyzing and improving system performance by optimizing code, queries, and server-side processes to enhance speed and scalability
- **Debugging & Troubleshooting:** Identifying, analyzing, and resolving system bugs and technical issues to ensure application stability and reliability
- **Version Control (Git):** Managing code repositories, versioning, and collaborative development workflows using Git-based systems
- **System Maintenance & Monitoring:** Performing routine system monitoring, maintenance, and backup processes to ensure high availability and system reliability

PROFESSIONAL EXPERIENCE

SEA Education International

2022 – Present

Software Engineer

- Developed and maintained 3+ internal web applications using Laravel & React JS, supporting daily operational processes
- Optimized database queries and reduced response time by approximately **20–30%**, improving system performance and user experience
- Integrated multiple REST APIs to enhance system functionality and automation across modules
- Performed routine system monitoring, backup, and maintenance, ensuring **99% system uptime**

PT Sentina Arta Sumberdaya

2019 – 2022

IT Support

- Installed and maintained **30+ hardware and software systems**, ensuring operational readiness across departments
- Troubleshot network and system issues, reducing technical downtime by approximately **30%**

- Configured printers, network devices, and system environments to support daily business operations

Other Experience

Kejuaraan Nasional Antar Pelajar Kelatnas Indonesia Perisai Diri VII Banten Dec 2023

Head of Registration and Competition Team

- manage 1200 participants and 1400 match numbers
- Provided recommendations on software, systems, and operational tools to support event management.
- Set up registration system, preparation, process and match scheduling system for team and participant.
- Give education and information for team & participant

Pencak Silat Open Tournament Banten Cup 4 Banten Mar 2023

Head of Registration and Competition Team

- Manage 500 participants and 700 match number
- Set up registration system, preparation and process for team and participant
- Give education and information for team & participant

Pencak Silat Open Tournament Kelatnas Perisai Diri Banten Cup 3 Banten Nov 2019

Registration and Competition Team

- Manage 400 participants and 450 match number
- Set up registration system, preparation and process for team and participant
- Give education and information for team & participant

PROJECT EXPERIENCE

SEA Education Training Platform Tech Stack: Laravel, Vue, MySQL

- Developed a web-based platform for overseas job training programs used by **100+ users**
- Built landing page, online registration system, and student management features

DNG Logistic Service System (Freelance Project) Tech Stack: Laravel, React, MySQL

- Built logistics and delivery management system handling shipment tracking and data management
- Developed core features for tracking, reporting, and operational data monitoring

SMP Kebangsaan Information System Tech Stack: Laravel, React, MySQL

- Developed school profile website and information system for internal and public use
- Managed content system and performed regular updates

TECHNICAL SKILLS

- PHP & Laravel
- JavaScript (React JS, Vue JS)
- MySQL Database
- REST API Development
- Git Version Control
- Basic Python & Java
- N8n & Claude Code
